

Fabri-Kal Expands Nexclear™ Line of Polypropylene Drink Cups

Fabri-Kal has expanded its line of polypropylene drink cups, Nexclear™, with three additional cup sizes. The new sizes added are 7 oz, 10 oz and a 9 oz Old Fashioned design. These new cups round out the full Nexclear line which now has seven sizes ranging from 7 oz to 24 oz. Clear flat and domed lids are also available.

The benefits of Nexclear are many including superior contact clarity, reliable lid fit, stylish design and their economical alternative to traditional APET clear cups.

As one of only a few companies producing polypropylene drink cups in North America, Fabri-Kal expanded its offering due to customer demand. "We kept hearing from our customers that they wanted the benefits of a clear cup in a more economical material" remarked John Burrell, Foodservice Sales Director for Fabri-Kal. Fabri-Kal now offers four complete cup lines to suite the beverage needs of virtually any customer. These lines include Kal-Clear (clear APET), Nexclear (clear PP), RK (translucent PS) and Greenware (clear PLA).

The Fabri-Kal Corporation, headquartered in Kalamazoo, MI, is a world class, private thermo-former of custom plastic packaging and foodservice products servicing the food, beverage and consumer products markets. Fabri-Kal celebrated its 50th anniversary in 2000 and may be found online at www.f-k.com
