**Fabri-Kal Introduces New Sip Lids for Cold Drink Cups
Foodservice Operators Can Skip the Straw with New Fabri-Kal Lids!**

KALAMAZOO, Mich. (August 20, 2019) – Fabri-Kal, known for exceptional customer service and product quality, is excited to launch their innovative Cold Drink Cup Sip Lids.

Fabri-Kal's Sip Lids are the perfect solution for foodservice establishments looking for straw alternatives. Consumer habits were researched to design a lid that is ideal for on-the-go customers. Fabri-Kal's Sip Lids safely protect beverages while preventing liquids from splashing during transport. The Lids provide a great beverage drinking experience with a smooth beverage flow.

Fabri-Kal's Sip Lids are compatible with Kal-Clear®, Nexclear® and Greenware® cups. The PET Sip Lid fits five popular Kal-Clear PET Drink Cups and four Nexclear Polypropylene Drink Cups. The new Greenware Sip Lid is made from plants, not petroleum, and fits three popular Greenware Drink Cup sizes. Greenware Cups and Lids are made from Ingeo™ biopolymer (PLA) and are compostable in commercial composting facilities, which may not be available in your area.¹

“Fabri-Kal is dedicated to producing innovative, stylish packaging with a reduced environmental impact,” said Mike Roeder, president and COO, Fabri-Kal. “Our new PET Sip Lids fit recyclable PET and Polypropylene Drink Cups, and our Greenware Sip Lids and Drink Cups are commercially compostable.¹ We are proud that all of our products are made in the U.S.A. by American workers.”

About Fabri-Kal

Fabri-Kal is a leading provider of foodservice and custom thermoformed packaging solutions. One of the largest thermoformers in North America, Fabri-Kal's customer base includes foodservice operators and consumer product manufacturers. Fabri-Kal specializes in a variety of materials including renewable agricultural fiber. Headquartered in Kalamazoo, Mich., and in continuous operation since 1950, Fabri-Kal employs more than 1,000 people in five manufacturing, printing and warehousing facilities throughout the United States. More information about Fabri-Kal may be found at the company's website, www.fabri-kal.com.

¹ BPI certified to be compostable in commercial composting facilities, which may not be available in your area. Not suitable for backyard composting.
